Professional Summary

Backend and Full-Stack Software Engineer with hands-on experience building **REST APIs, real-time applications, and scalable web platforms** using modern JavaScript technologies. Strong foundation in **Data Structures & Algorithms, backend development, database design, and system design**, with a strong interest in building efficient software systems and continuously learning modern backend and cloud technologies.

Education

Jalpaiguri Government Engineering College

Bachelor of Technology in Computer Science & Engineering

Nov 2022 – July 2026

CGPA: 7.7/10

Experience

Backend Developer Intern – Graphura India Private Limited

Jan 2026 – Apr 2026

- Developed and integrated **15+ REST APIs** using **Node.js** and **Express.js** for authentication, role-based access control, and frontend-backend communication.
- Collaborated with frontend developers using **GitHub** for feature integration and code reviews; designed optimized **MongoDB schemas** to improve query efficiency and backend scalability.

Research Intern – Indian Statistical Institute, Kolkata

Summer 2023

- Completed a research internship in **Quantum Computing** at **ISI Kolkata**, studying topics such as quantum algorithms, quantum teleportation, and computational models under faculty guidance.
- Strengthened analytical thinking and research problem-solving skills through exposure to foundational concepts in quantum computing.

Projects

STUDYBUDDY | React.js, Node.js, Socket.IO, MongoDB, Redux Toolkit, JWT

- Built a real-time collaboration platform using **React.js, Node.js, Socket.IO, and MongoDB** featuring shared channels, live chat, and collaborative rich-text editing for multiple concurrent users.
- Implemented conflict-free real-time synchronization using **Yjs** with Socket.IO event-based communication to ensure consistent document updates across connected clients.

JOB TRACKER API | Node.js, TypeScript, Express.js, MongoDB, Redis, Docker

In Progress

- Developing a job tracking REST API using **TypeScript, Node.js, and Express.js** with features such as **JWT authentication**, application status management, and automated email reminders using **Nodemailer** and **node-cron**.
- Integrating AI-based job description to resume matching with **Redis caching** for optimized API performance and containerizing the development environment using **Docker**.

INTERVO | Next.js, TypeScript, Vapi AI, Groq LLM, Firebase, Zod, Tailwind CSS

- Built a real-time AI mock interview platform supporting **voice-based technical and behavioral interviews**, dynamic question generation, and structured interview evaluation workflows.
- Implemented **real-time communication**, AI-generated feedback, and authentication workflows; deployed the frontend on **Vercel** and backend services on **Render**.

NEWSDESK | React.js, Node.js, MongoDB, Redux Toolkit, Firebase, Cloudinary

- Developed an **AI-powered news aggregation platform** with category-based filtering, full-text search, and real-time news updates for improved content discovery.
- Integrated a **third-party AI API** for automated news summarization and deployed the application using **Vercel** and **Render** for scalable frontend and backend hosting.

Skills

Languages: C++ , JavaScript, TypeScript, SQL

Backend & Full-Stack: Node.js, Express.js, REST APIs, MongoDB, Redis, JWT Auth, React.js, Next.js, Redux Toolkit

Tools & CS Fundamentals: Docker, Git, Postman, Firebase, Vercel, Render, DSA, OOP, DBMS, OS, CN

Certifications

HackerRank: Problem Solving (Intermediate), SQL (Intermediate) — 2025

Achievements

- Competitive Programming:** LeetCode rating **1700+** (top 12%, **450+ problems solved**); **2-Star Coder** on CodeChef.
- Academic:** Secured **AIR 1905** in **WBJEE 2021** (top 1.3%) out of 100,000+ candidates.
